BLACK METAL AT BARCELONA

Black sulphides of silver are showing in quantities in the Spanish Belt mine. This showing is coming in in strong bunches impregnating the rock with the values running from \$100 up. The black metal was not expected for another 30 feet but it looks as though the management had been rewarded ahead of time. After the holiday cessation the company resumed work with 22 employees working in two shifts. Two more men were sent out this morning and the force will be increased as soon as the company finds housing room for more.

The west drift of the main tunnel is in 35 feet with the face sampling \$79.75. Black sulphides are showing in bunches and old timers say the former company used to ship quantities of this stuff to Eureka, Austin and Salt Lake which brought smaller returns of \$100 per ton. Two shifts are working on the Buford air shaft which has been opened down for a distance of 75 feet with the expectation of reaching the old bulkhead which would communicate with the tunnel at a depth of 400 feet. The San Pedro drift has been driven 27 feet since operations were started, making 27 feet in a week's time. Every round shows an improvement in value, the faces showing scattered quartz and blue line showing sulphides. Assays at a distance of 10 feet in gave \$24 a ton and at 22 feet these improved to \$23 and \$25. The indications are that the orebody is a short distance ahead.

Crosscuts are being run every 25 feet. The company is building a sorting platform and will start shipping to the smelter before long.

RESIGNS AS SECRETARY OF NUMEROUS COMPANIES

Edwin Oyster, who has been secretary of the Wingfield-Brougher-Crimley Divide companies has resigned to resume his home at Berkeley where he has a beautiful home. The step is due to the fact that Mrs. Oyster is unable to live in this altitude. The services of Mr. Oyster will be resumed by the above companies and he will return once a quarter in the capacity of general auditor. He leaves tonight for the coast.

FOR SALE—In good condition, 1918 Chevrolet touring car, model 490. Phone 256, P. O. box 675. Inquire Bert Polhard. 1432Jy1001

FOUND—Card case with registration card; same may be had Bonanza office, by paying for this ad. 1431Jy912

YOU NEED not be without the real article. Make in your own home, the same as the brewer or distiller can. Eight valuable formulas, \$1. Northern Dist. Co., Minneapolis, Minn. 1430Jy1311

WANTED—Watchmaker's bench. Address box "E. F." Bonanza office. Jy91f

FOR SALE—Delivery wagon, horse and harness. All in first class condition. Call A. Del Papa store. 1352M121f

NOTARY PUBLIC—John G. Martin, 604, or 507 Brougher avenue.

GREAT FUTURE FOR CANDELARIA

Big things are now promised for the old Candelaria district, says the Western Nevada Miner. A. J. Jarbo, general manager of the Candelaria Mines company, which recently took over the Lucky Hill and Mount Diablo properties, returned this week from New York City where he has been for some time in connection with the proposition. He was accompanied by L. P. Coleman of Coleman & Reitz, New York City brokers, who are looking after the interests of the New Yorkers' interests in the property. New York capital is now heavily interested in the proposition, the stock selling at \$25 per share on the New York market, and according to advices from that city there was quite a wild scramble to get in on the ground floor.

It is reported that power will be brought in from the electric power line of the Nevada-California Power company, the line being tapped at a point in the White mountains, making a short transmission line. A large reduction plant is also to be constructed in the near future.

With the other companies recently getting into the district the present season promises to again put Candelaria in the limelight in a mining way. Another deal is now on for the P. A. Simon holdings in that camp, the basis being \$100,000, with a \$10,000 cash payment, and from all indications this will be consummated in the near future.

PYRAMID DIVIDE STOCK

All holders of this stock take same immediately to First National Bank for registering.

FRANCIS MOORE,

Secretary.

Daily Thought.

Goodness is the only investment that never fails.—Henry David Thoreau.

PROVE OREBODY ON THE SIMON

Notwithstanding that the past week took in the holidays, work has been steadily pushed on the Big Simon lead property. The east crosscut of the big orebody on the 400-foot level is being driven for 100 feet at which point a second crosscut of the big orebody on the 400-foot level is being driven for 100 feet north to prove the orebody at that point. The drive on this crosscut is being made on No. 1 ore, according to reports a better and higher grade than that opened in the first crosscut. The silver values especially being higher. So far as showing up the big body of sulphide ore on the 400-foot level the east crosscut is a repetition of the first crosscut just completed from the shaft to the hanging wall for a distance of 219 feet, practically all ore and no waste.

Another drift is being run to the west and when the 100-foot point is reached another crosscut for 100 feet will be driven to the hanging wall to prove the orebody at this point and when this is completed the work of sinking to the 500-foot level will be resumed. In running the drift to the west a small time horse was encountered but this was gone through in a few feet and the ore again struck. The work is going ahead steadily and the results being obtained are exceedingly satisfactory to the management. The work now being performed is blocking out an enormous tonnage of ore—Western Nevada Miner.
